In the Office Action dated 6/9/2004, designated as Paper No. 5 in the above-captioned application, the Examiner issued a Restriction Requirement identifying the following groups of claims as being drawn to potentially distinct inventions:

Group I. Claims 1-8, drawn to the add/drop multiplexer, classified in class 398, subclass 83; and

Group II. Claims 9-17 and 18-19, drawn to a structure of tunable switching device and switching method, classified in class 398, subclass 45.

The Examiner asserted that these inventions may be regarded as distinct from one another because they are related "as subcombinations disclosed as usable together in a single combination."

Accordingly, Applicants elects to prosecute the claims of Group II (i.e., claims 9-17 and 18-19), without traverse.
